The head-wedge elevation was uniquely designed with a counter-foot-wedge that holds the child in place all night. The Toddler Pillow/Bed is designed with the growing child in mind, using a foot-adjusting feature to account for growth of the child. This feature makes the Toddler Bed/mattress a long-term form of treatment for children's sleep breathing - related disorders.

Warning: The ComfyLiftBed™ mattress is intended only for children 1 yr and older!

European & Am. Pediatric Society Recommendations:

◆5.1.3. Lifestyle Changes in Children and Adolescents It is likely therefore that adolescents, like adults, may benefit from the left lateral decubitus sleeping position with elevation of the head of the bed.

The bed/mattress is designed to have an elevated **head rest** that raises the upper body of the child. This elevation will keep stomach acid out of the esophagus, as well as assist in breathing. We have also included a **3" or 5" (adolescent) wedge to prop the top head** portion of the pillow up higher in cases where children have more severe symptoms or require higher elevation. Since children tend to

roll off of the side of the mattress, a **side barrier** on each side of the mattress creating a **concave design** that will cradle the child in the center of the mattress. Many sleepers will slide down the mattress as well. To correct this, **foot rests** have been added. Higher elevation (all 3) foot rests are for younger children. As the child grows, the **foot rest wedges (2 removable)** may be removed to allow the child to stretch out, therefore providing a more comfortable sleeping position. This mattress/bed will be sold with mattress pad in order to waterproof the mattress/bed for younger children. A fabric cover (provided) should be placed after the mattress pad is in place over all the components. Your ComfyLiftBed™ was vacuum sealed for shipment and may have a

“NEW FRAGRANCE SCENT”

Advantages of our Pillow

- There is no need to strap down your child. Your child is able to move freely and change sleeping positions for natural, restful sleep.
- Your child does not slide off of the elevated mattress. The built-in counter-leg support allows all-night elevated positioning.
- It is the only available Toddler (one year and older) Bed, that we know of, designed to help with sleep breathing disorders, Acid Reflux, and respiratory difficulties in the Nation!
- With comfort in mind, the ComfyLiftBed™ is constructed using the most advanced materials to ensure maximum comfort for your child. The mattress features a 2” soft (non-collapsing) overly.
- The ComfyLiftBed™ is easy to install in a toddler frame or can be placed on floor.

Warning: *If your child is of crawling/walking age, we recommend that the ComfyLiftBed™ (which is self-contained, can be placed on floor) be placed in a lower toddler bed frame to prevent any accidents. If child is at risk of a fall on a hard surface, please place soft padding around the perimeter of the bed.*

The ComfyLiftBed™ is designed for children one year of age and up. Not intended for infants less than one year of age.
